

a Owner binding: where authenticated state enters

Focus: the state-dependent part of (i). Authorization in (ii) is outside this comparison.

b Change the anchor; keep the account and storage proof

Mainnet block 25,939,968; Safe slot 0. RLP, trie routing and all required hashes run inside the VM.

*Hypothetical SSZ summary with the real state root. Fixed public shape; owner hiding is not demonstrated.
